*Verse 2:*  
 Our galaxy itself contains 100 billion stars,  
 It's 100,000 light years side to side.  
 It bulges in the middle, 16,000 light years thick,  
 But out by us it's just 3,000 light years wide.  
 We're 30,000 light years from galactic central point,  
 We go 'round every 200 million years.  
 And our galaxy is only one of millions and billions  
 In this amazing and expanding universe.

*Verse 3:*  
 Our universe itself keeps on expanding and expanding  
 In all the directions it can whiz.  
 As fast as it can go, the speed of light you know,  
 12 million miles a minute, and that's the fastest speed there is.  
 So, remember when you're feeling very small and insecure  
 How amazingly unlikely is your birth.  
 And pray that there's intelligent life somewhere up in space,  
 'Cause I'm afraid that we've been cheated here on earth!
